

Improved web access for retirement fund members

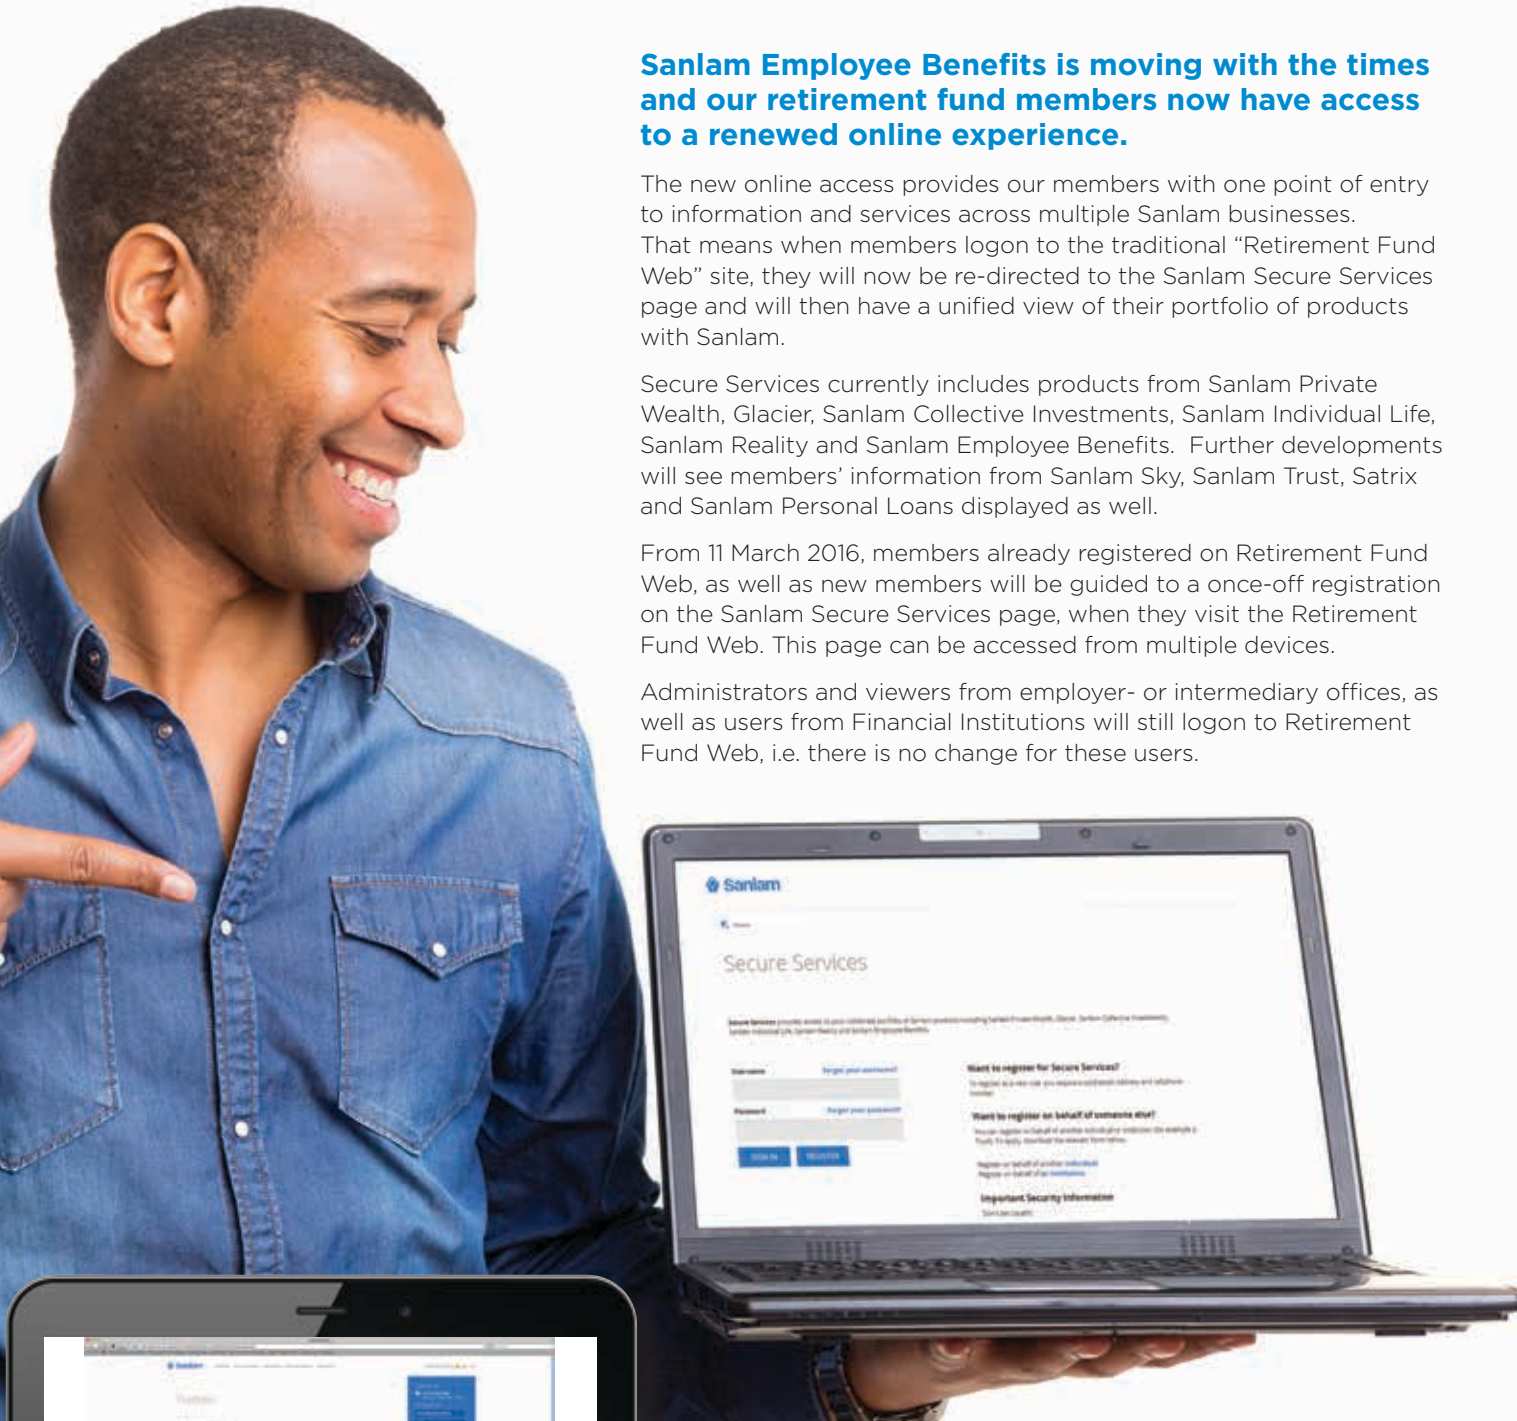

Sanlam Employee Benefits is moving with the times and our retirement fund members now have access to a renewed online experience.

The new online access provides our members with one point of entry to information and services across multiple Sanlam businesses. That means when members logon to the traditional "Retirement Fund Web" site, they will now be re-directed to the Sanlam Secure Services page and will then have a unified view of their portfolio of products with Sanlam.

Secure Services currently includes products from Sanlam Private Wealth, Glacier, Sanlam Collective Investments, Sanlam Individual Life, Sanlam Reality and Sanlam Employee Benefits. Further developments will see members' information from Sanlam Sky, Sanlam Trust, Satrix and Sanlam Personal Loans displayed as well.

From 11 March 2016, members already registered on Retirement Fund Web, as well as new members will be guided to a once-off registration on the Sanlam Secure Services page, when they visit the Retirement Fund Web. This page can be accessed from multiple devices.

Administrators and viewers from employer- or intermediary offices, as well as users from Financial Institutions will still logon to Retirement Fund Web, i.e. there is no change for these users.

What are the benefits to members?

Our members will experience a simplified way of dealing with multiple Sanlam businesses and a single online access point to information and services.
